

a The same manuscripts...

7.62 million eligible articles, 2015–2020, on a title-content map (UMAP of a 16% sample).
3.83 million compared papers colored by research area; 3.79 million outside common support in gray.

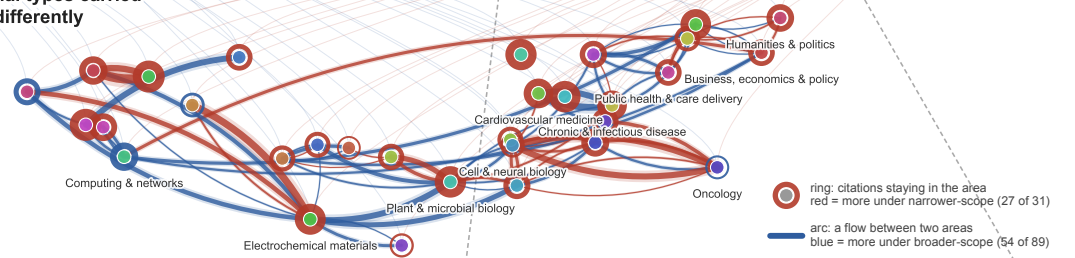

b

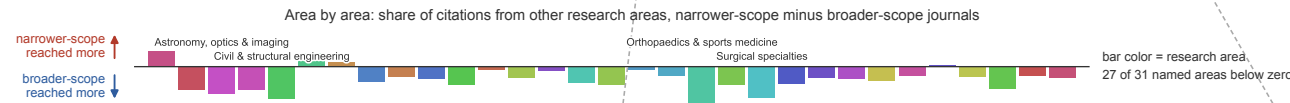

c

Where the two journal types carried the same citations differently

d

e

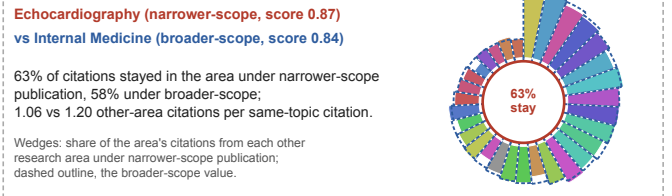

Across all 3,818,173 compared papers

From other research areas: 2.95 vs 2.55 citations per paper
From the same topic: 2.05 vs 1.96 citations per paper
Other-area per same-topic: 1.44 vs 1.30

9.2% lower for narrower-scope journals
(95% CI, 4.8% to 13.4% lower)

f
