

Journals ranked by scope

From titles each journal published in years $[t_0-3, t_0-1]$
Ranked within each topic and year

Scientific communities reached, $[t_0, t_0+5y]$

Each citing paper placed by its own title on one map

Publication

year t_0-3

year t_0-1

t_0

$[t_0, t_0+5y]$: citations counted

t_0+5y

Narrower-scope journal

Broader-scope journal

Similar papers published at t_0

Compared with papers of the same topic and year; balanced by weighting on authors, institutions, and journal history recorded before t_0

Primary Outcome

Citations from other areas

Citations from the same topic

Narrower vs **broader** at t_0+5y
