

a Across all 3,818,173 papers in the comparison sample

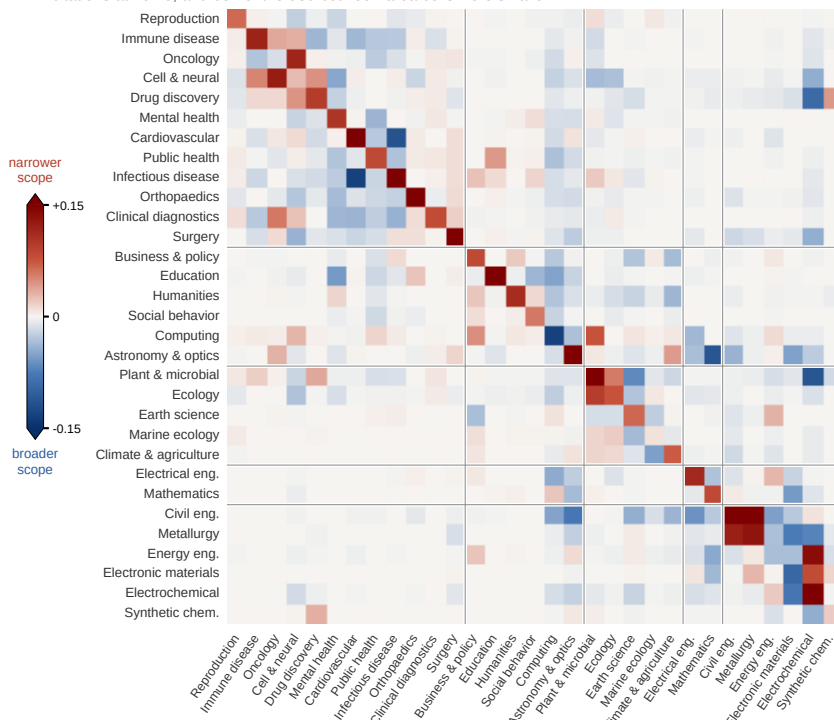

adjusted citations per paper over five years, broader scope then narrower;
difference and 95% confidence interval below each pair

9.2% lower

other-area citations per
same-topic citation
(1.30 vs 1.44; 95% CI,
4.8% to 13.4% lower)

b Where the citations came from, research area by research area

warm diagonal, cool grid: 27 of 31 areas kept a larger share of their
citations at home, and 657 of the 930 between-area cells were smaller

c Each research area, on its own
